

AUTOMATIC REFILL DEVICE FOR SINGLE TANK CARTRIDGES

55+

DIFFERENT CARTRIDGES FILLED

The cartridges do not have to be refilled manually anymore - you only have to insert the cartridge into the device, close the clamp and activate the filling plunger by the foot pedal switch!

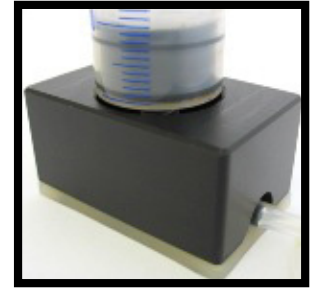

- **Easy to use**
- **No Drilling or gluing necessary**
- **Short filling time**
- **Increase production, decrease filling time**
- **Fills Canon and HP single tanks**
- **Additional exchange heads available for instant ink change**

Canon:
BCI3 / BCI6 / PGI5 / CLI8 / PGI520 / CLI521 / PGI525 / CLI526
HP:
564 / 920 and more

Fillomat Accessories

Additional exchangeable filling head. Available in 3 pack or singles.
For a easy and quick change over to other colors or other ink. This allows a quick ink change without cleaning the supplied single head of the AutoFilloMat.
Simply exchange the fill head with another head hooked up to an alternate ink supply bottle. eg quickly change from Canon Pigment black to HP Cyan

Other CBR products

HP CANON JIG

Single Jig is now a multi use refill tool to fill the tank cartridges of HP and Canon.

This jig comes along with several different inserts to refill about 25 different cartridge types!

The cartridges are mounted in the fill box air-tight. After connecting a 60ml luer lock syringe which is filled with the appropriate ink and colour, it fills cartridges by doing small movement on the plunger of the syringe.

TESTER 200

The most advanced stand alone cartridge tester available. Accurately test full functionality of more than 150 HP, Lexmark, Dell, Canon and Samsung inkjet cartridges !

- **Much FASTER** than any inkjet printer
- **Full T.S.R. testing**
- **Pre fill electronic check**
- **Free software / firmware upgrades**
- **Provide detailed customer feedback**
- **Self learning recognition mode for new models**
- **Code reset capability**
- **Programmable text on test print strip**
- **Statistics**
